

Dear Natural Resources, Environment & Great Lakes Committee Members:

Senator Casperson is to be congratulated for his support of the various individuals, organizations, and governmental jurisdictions that have asked him for representation in our efforts to secure financial assistance from the state to combat the spread of Invasive Species on all bodies of water within Watersmeet Township boundaries.

SB 444 is the end result of the combined efforts of many folks after attending town hall and associated meetings to review the harm these organisms can have on our eco systems.

It is time that action is taken by the state to assist us with funds in combating these Invasive Species.

I urge every member of the Senate to support SB 444.
